

SINL

International Logistics

ABOUT US

The key purpose of SINL is to create innovative value providing an optimal digital solution in the entire process of logistics from production to consumption through digital transformation amid an accelerating shift towards smart logistics in the industry. SINL provides extensive multi-services including e-commerce fulfillment services, as well as high value 3PL logistics and terminal CFS logistics services by optimizing a customer's logistics operation process using a different smart logistics system with logistics experts, and is expanding and advancing the businesses thereby.

SMART LOGISTICS CENTER

SINL Incheon New Port Smart Logistics Center obtained the first smart logistics center certification of the Ministry of Land, Infrastructure and Transport in Incheon.

The smart logistics center certification is granted to excellent logistics centers that meet the standard of high-tech logistics center having a cutting-edge and automated logistics facility and efficient and safe management system, along with administrative and financial benefits. In particular, we are proven to have a different competitiveness in operating 3PL services and digital e-commerce fulfillment services across the board from receipt/release management, storage, distribution, processing, inspection and transport in cooperation with the nation's first nonferrous metal material platform, Sorin.com through the smart center certification.

Optimum geographical accessibility

Around 1 km away from Incheon New Port in linear distance, which gives optimum geographical accessibility for import/export CFS, cargo storage and transport work (permitted bonded area)

Best infrastructure/facility

A ramp structure that has 2 stories above the ground with a total floor area of approximately 7,000 pyeong which can accommodate 34 container trailers at once in each floor. We have the basic infrastructure and facility for last mile logistics operation with a 1/2-level rack facility.

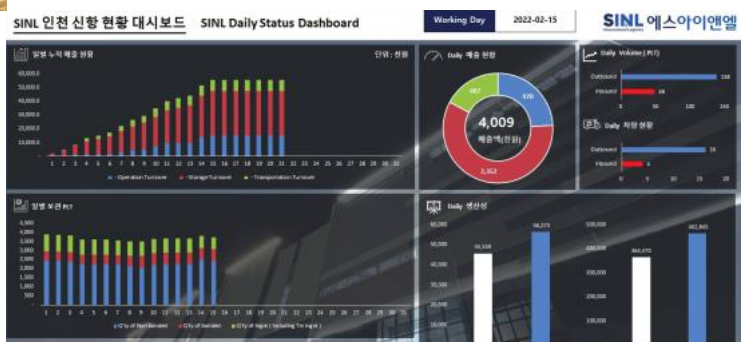

Various logistics services in connection with logistics centers

Various digital logistics services from storage to transport, terminal CFS/LCL, 3PL logistics, multimodal transport arrangement and e-commerce fulfillment

SINL smart logistics solution

Digital IT services using Concall (automatic car dispatching platform) operation, as well as best certified logistics systems (OMS, WMS, TMS) and shipper collaboration web

MISSION & VISION

MISSION

We plan to make new innovations and challenges continuously to provide innovative and smart logistics services to customers, and further grow into a digital 3PL-specialized company that provides e-commerce fulfillment services in connection with various e-commerce platforms in and out of the country.

VISION

We pursue creating an innovative value providing a smart logistics solution by optimizing a customer's logistics operation process across the board through digital transformation.

Smart Challenge

Great accomplishment from practical challenges of talented organizational members at every moment

Disruptive Innovation

Disruptive innovation to achieve infinite growth

People & Culture

Organizational culture where talent can grow and flourish with the organization

Overview of SINL Incheon New Port Smart Logistics Center

Distance from Incheon New Port	Total floor area	Capacity	1/2-level connection ramp dock
0.9 Km	23,256 m²	13,200 Pallet	1F - 19 Dock 2F - 15 Dock

Geographical accessibility

Performs the role of harbor logistics base using the geographical accessibility to Container terminal 2 Incheon New Port (handling volume: 3,300,000 TEU/year)

Volume of transport

Covers the volume of transport in the entire capital area
